EXAMINER'S AMENDMENT

- An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- The application has been amended as follows: On page 1, of the specification, line 6, after, "filed February, 2001", please insert, "now Patent Number 6,735,337 B2".

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method for designating a text symbol set to withstand partial obscuration. Independent claim 1, identifies the uniquely distinct feature, “wherein for each character individually, one of the at least three regions of the character is obscured, while computing the correlation coefficients for all selected regions and adjusting the character set design to produce maximum overall character detection accuracy with one region obscured”; Independent claim 2, identifies the uniquely distinct feature, “wherein for each character, obscure one of the three regions, while computing the correlation coefficients for the entire character set and adjusting the regions shape and overlap to produce maximum overall character detection”; Independent claim 3, identifies the uniquely distinct feature, “wherein for each character, obscure one of the three regions, while computing the correlation coefficients for the entire character set and adjusting the weights to produce maximum overall character detection”. The closest prior art, Yamauchi et al. (USPN 6,775,418 B1) disclose wherein an

image processing device detects the correlation between a pixel to be removed in thinning pixel blocks generated by using a delay in horizontal and vertical directions and an adjacent pixel, the device then determines a coefficient corresponding to the correlation; while Kamitani (USPN 6,327,385 B1) discloses for character segmentation device and character segmentation system and Huttenlocher et al. (USPN 5,557,689) disclose optical word recognition by examination of word shape, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
